Dr. John Doulis, Department of Biomedical Informatics, Vanderbilt University

Dr. John Doulis assumed the role of Assistant Vice Chancellor for Health Affairs and Chief Operations Officer of the Informatics Center at Vanderbilt University Medical Center in October 2005. In this role, he is the single point of focus for the Informatics Center's efforts to provide the most effective information technology infrastructure to meet the needs of the diverse operating units that make up the medical center, including the information systems, software engineering, technological integration and network services. The scope of this infrastructure encompasses Vanderbilt University Medical Center's education, research, and health care missions.

Dr. Doulis earned an MD degree in Medicine and Surgery from Monash University in Melbourne Australia in 1993. He was a medical practitioner and medical informatics officer at Waverly Medical Centre, Andrikon Services, Ltd, Touchcorp, Ltd and Endeavor Healthcare in Melbourne between 1995 and 2003. In 2003, Dr. Doulis joined Memorial Hospital of Gulfport in Gulfport, MS as Vice President and Medical Information Officer.

Dr. Doulis was a member of the Health Informatics Society of Australia and Australian Medical Association from 1994 – 2002. He is currently a member of the American Medical Informatics Association (AMIA), Health Information Management Systems Society (HIMSS), and College of Healthcare Information Management Executives (CHIME).

As Chief Operations Officer at Vanderbilt, Dr. Doulis is responsible for a staff of 400 employees, and a budget of \$70 million. Since coming to Vanderbilt he has also assumed the role of Associate Chief Information Architect, Enterprise Informatics for the whole University and IT Risk Officer for the whole University.
